

# JOBSITE SAFETY TALK

**"ON-SITE TRAINING YIELDS A SAFE, PRODUCTIVE WORKFORCE"**

22-15

May 9, 2022

## WORKING UNDER THE LIGHTS

Working on roads or highways at night can be particularly dangerous because of poor visibility for both motorists and workers. There is also a risk posed by impaired or drowsy drivers and sleep-deprived or drowsy workers. To help ensure safety:

Report to your supervisor:

- Any lighting that shines directly into oncoming traffic.
- Non-working lights, flashers, beacons arrow boards, etc.
- Signage, cones, or other traffic control devices that are defective or improperly placed or have been moved.

Make sure work vehicles have appropriate beacons and light signals to ensure operator and traffic visibility.

Provide clear signage. Place drums and cones and other traffic control devices closer together at night.

Wear reflective clothing that meets night work criteria.

Know your surroundings, including vehicle and equipment paths, assigned work areas, and safe paths to and from work.

On foot, watch out for equipment.

On equipment, watch out for workers.

Always.....see and be seen!
